MESSAGE

I am glad to know that the University, Scientific and Technical Documentation Centre attached to the Office of the Counsellor for Cultural, Scientific and Technical Co-operation, French Embassy, New Delhi, is bringing out a Directory of former Indian Scholars and Trainees in France. I am pleased to note that the First Edition of the Directory will contain about 1000 entries. I realise the difficulties in establishing contacts with all those in different parts of the country. The publication of a Directory of this kind will, however, ensure more intimate contacts not only between Indian alumni of French institutions themselves, but also between them and their parent institutions in France. I do hope that this publication will prompt a larger number of Indian scholars who had returned from France to respond to your request so that this Directory can ultimately be as comprehensive as possible.

Academic contacts and exchange of scholars are important instruments of international co-operation. Such contacts help scholars and intellectuals in different countries to understand the problems of development in different countries. We are glad that the Government of France have been offering a large number of scholarships to Indian scholars to engage themselves in advanced studies and research in the institutions in France. I hope this co-operation between India and France will grow from strength to strength in the years to come.

S.B. CHAVAN

MESSAGE

C'est avec plaisir que j'accueille la réalisation de cet Annuaire des Anciens Boursiers et Stagiaires Indiens du Gouvernement Français qui rassemble nombre d'informations recueillies par le Centre de Documentation Universitaire, Scientifique et Technique (CEDUST), rattaché aux Services Culturels de ce Poste.

Quoique encore non exhaustive, cette publication—la première du genre—a été conçue pour atteindre un double objectif : donner, d'une part, à ceux qui ont effectué, en France, un séjour d'études ou de formation, l'occasion de nouer ou de renouer des liens afin de susciter entre eux un courant d'échanges, et, mettre, d'autre part, les Services Culturels et Economiques de cette Ambassade en mesure d'établir, avec tous nos anciens Boursiers et Stagiaires, des contacts réguliers en diffusant à leur intention information et documentation et en organisant des manifestations diverses dans le domaine de leur spécialisation.

Ambassadeur de France en Inde

MESSAGE

I am happy to witness the birth of this Directory, a new tool which, I am sure, will enable the strengthening of exchanges between India and France.

These exchanges are now very diversified. They are cultural and scientific as well as industrial and economic.

The "Agence Française de Coopération Technique et Industrielle" (ACTIM) has, from its side, contributed in a significant manner towards this end and in many varied fields. I am therefore particularly glad to see the names of former trainees in technical co-operation included in this document.

It constitutes the embryo in the creation of a new diversified community of the friends of France in India who will strengthen and enrich the links already existing between our two countries.

Francis CHAMBON
Economic and Commercial Counsellor
French Embassy, New Delhi

FOREWORD

This Directory is the incomplete and imperfect result of a long and arduous task. In order to list the 1000 odd names which figure therein, we had to send out more than 10,000 letters, many of which were returned to us undelivered, the addressees having changed their addresses over the years. We will thus be grateful to all those who let us know the names and addresses of persons not mentioned in this document.

The aim in bringing out this Directory is to renew contact with those who have been to France on scholarship or on training and who wish to maintain their ties with this country in the cultural field as also in the field of Science and Technology. In addition, this Directory will permit people from different walks of life but sharing a common link, to make or renew acquaintance.

For this purpose we have no dearth of projects in mind. To begin with, we wish to group all those who are interested, into one single Association to which we could offer the different means at our disposal, with a view to remaining in regular contact.

A Centre for University, Scientific and Technical Documentation was set up in the Office of the Counsellor for Cultural, Scientific and Technical Co-operation a year ago. One of the main objectives of this Centre is to keep Indian Scientists—especially ex-scholarship holders and trainees—abreast of the progress in all fields of research in France. It has recently started bringing out a Bulletin "NEWS FROM FRANCE : SCIENCE AND TECHNOLOGY" intended for all those who are interested. This Centre has the facilities for organizing exhibitions and films on a wide range of subjects.

In addition, the eleven Alliance Française that exist in the country are willing to organize shows and reunions for the benefit of all those who have been to France on scholarship or training.

The recently created Publications Section, also attached to my Office, endeavours to present, through its periodical "Books from France", a selected sample of major French works pertaining to diverse domains. All contributions to this bulletin from our former scholars and trainees will be gladly received.

The numerous suggestions offered to us through the questionnaires that we sent out will be examined in detail; but any new suggestions and ideas are welcome.

My greatest wish is to see established, as early as possible, close ties with those of you who desire it and I hope that these new ties can in turn be the source of close co-operation between India and France.

The cover of the Directory itself bears witness to this wish. The Front cover shows an airport which many have not seen but which is waiting to welcome them. The end cover illustrates our desire to capture into a well-defined reality this distant nebulous mass or the juxtaposition of meteors across a darkened sky that our ex-scholarship holders have represented for us until now.

Technical Co-operation
